

REFERENCE CONFIGURATION

Flatbed Wrecker with Crane

A flatbed wrecker with crane needs separate checks for deck payload and crane loads. Review loading geometry, outrigger setup and axle loads, including how equipment will be handled and stowed.

DOCUMENT ID	KRS-RC-015
REVISION / ISSUE DATE	1.1 / 2026-09-07
CLASSIFICATION	Reference Configuration - no verified commercial model asserted
EVIDENCE CLAIM	KRS-CLAIM-PRODUCT-RECOVERY-CRANE

Product data and configuration

Product specifications published by KEEYAK. Final values are confirmed for the selected chassis, configuration and destination.

Final dimensions, installed equipment, route suitability and acceptance records are confirmed for the selected project.

Technical specifications

Flatbed Length

4000-7000 mm

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Flatbed Load Capacity

5 t

Status: source-stated. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Winch

4-15 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Rear Tow Boom

2.5-15 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Crane Type

Telescopic / Knuckle

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Crane Capacity

Model-specific; confirmed against the installed crane's load chart

Status: source-stated. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Acceptance record requirements

- 1. Reconcile winch, boom, underlift, deck, restraints and accessories to the approved load-case schedule.
- 2. Witness the agreed functions and safety devices without treating a demonstration as a universal capacity proof.
- 3. Record completed-vehicle mass, axle loads, rated documentation, controls, manuals and exceptions.
