

REFERENCE CONFIGURATION

Pickup Tow Truck

For light urban recovery, compare the pickup tow truck with the vehicles it will recover. Check wheel-lift geometry and payload reserve, along with maneuverability and the space needed to operate.

DOCUMENT ID	KRS-RC-018
REVISION / ISSUE DATE	1.1 / 2026-09-07
CLASSIFICATION	Reference Configuration - no verified commercial model asserted
EVIDENCE CLAIM	KRS-CLAIM-PRODUCT-RECOVERY-PICKUP

Product data and configuration

Product specifications published by KEEYAK. Final values are confirmed for the selected chassis, configuration and destination.

Final dimensions, installed equipment, route suitability and acceptance records are confirmed for the selected project.

Technical specifications

Towing Capacity

2-5 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Wheel Lift Capacity

1-2.5 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Winch Capacity

2-5 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Drive Type

4 × 2 / 4 × 4

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Operation Type

Manual / Wireless Remote

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Underlift Type

Telescopic & Folding

Status: source-stated. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Acceptance record requirements

- 1. Reconcile winch, boom, underlift, deck, restraints and accessories to the approved load-case schedule.
- 2. Witness the agreed functions and safety devices without treating a demonstration as a universal capacity proof.
- 3. Record completed-vehicle mass, axle loads, rated documentation, controls, manuals and exceptions.
