

REFERENCE CONFIGURATION

Rotator Wrecker

For heavy vehicles, rollovers or difficult access, agree the recovery method before choosing a rotator. Check the boom chart, outriggers, ground loads, winches and rigging, then confirm the mass for road travel.

DOCUMENT ID	KRS-RC-019
REVISION / ISSUE DATE	1.1 / 2026-09-07
CLASSIFICATION	Reference Configuration - no verified commercial model asserted
EVIDENCE CLAIM	KRS-CLAIM-PRODUCT-RECOVERY-ROTATOR

Product data and configuration

Product specifications published by KEEYAK. Final values are confirmed for the selected chassis, configuration and destination.

Final dimensions, installed equipment, route suitability and acceptance records are confirmed for the selected project.

Technical specifications

Rotator Lifting Capacity

30-50 t

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Rotation Angle

360°

Status: source-stated. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Boom Extension

3-10m

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Winch Capacity

15-25 t (dual)

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Outrigger Span

5-8m

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Operation Type

Manual / Wireless Remote

Status: source-stated-range. Verification: Confirm against the selected chassis, rated recovery equipment, load case and completed-vehicle records.

Acceptance record requirements

1. Reconcile winch, boom, underlift, deck, restraints and accessories to the approved load-case schedule.
2. Witness the agreed functions and safety devices without treating a demonstration as a universal capacity proof.
3. Record completed-vehicle mass, axle loads, rated documentation, controls, manuals and exceptions.
